Speaking of Tiyulim... Ever try one by submarine? **צוללת**. Especially a nuclear sub, which is powered by a reactor, **כור גרעיני** or **מגוב**. The propeller (just like those of an airplane) is called **מדחף**. The rudder that steers the sub (just like the steering wheel of a car) is a **הגה**. Missile is a **טיל** which is contained in a missile tube known as a **זביל הטיל**. What's the **מצפה**? The conning tower. NYK

The jaragua lizard, found only on a tiny island of the coast of the Dominican Republic, discovered in 2001, is thought to be - not only the smallest known lizard but the smallest reptile and perhaps the smallest of over 23,000 species of reptiles, birds, and mammals.
